

Press Release

Standard & Poor's Announces the October 9th Weekly Rebalancing for the S&P/LSTA U.S. Leveraged Loan 100 Index

New York, October 8, 2009– Standard & Poor's Index Services today announced the October 9th weekly rebalancing of the S&P/LSTA U.S. Leveraged Loan 100 Index. All rebalancing related changes to the Index will become effective after the close of business on Friday, October 9th, 2009.

The S&P/LSTA U.S. Leveraged Loan 100 Index is a market value-weighted index designed to measure the performance of the largest facilities in the leveraged loan market. The Index consists of 100 loan facilities drawn from the leading broad market leveraged loan indicator - the S&P/LSTA (Loan Syndications and Trading Association) Leveraged Loan Index.

All syndicated leveraged loans covered by the S&P/LSTA Leveraged Loan Index universe are eligible for inclusion in the S&P/LSTA U.S. Leveraged Loan 100. The S&P/LSTA U.S. Leveraged Loan 100 Index is rules based, although the S&P/LSTA U.S. Leveraged Loan 100 Index Committee reserves the right to exercise discretion, when necessary.

Standard & Poor's calculates the S&P/LSTA U.S. Leveraged Loan 100 Index using the LSTA/LPC Mark-to-Market Pricing to value each tranche in the index. The index only uses prices from LSTA/LPC Mark-to-Market pricing, which is based on bid/ask quotes gathered from dealers.

S&P Loan Commentary and Data, a leading information provider to the leveraged finance community, is the source of loan data and the calculation agent for these indices. Detailed Index data and analysis is incorporated into S&P Loan Commentary and Data's research tools.

The leveraged loan market consists of loans made to speculative-grade borrowers. The vast majority of loans are senior secured floating-rate paper that the issuer can prepay with little or no restrictions or fees. In this universe, loans are either first-lien or second-lien. As their monikers imply, first-lien loans have a senior claim on collateral, while second-lien loans have a junior claim. In general, loans range in size from \$50 million at the low end to upward of \$10 billion on the high end.
